

CASTANEA,
The Journal of the Southern Appalachian Botanical Society

Advertising Information

Scope of the Journal

Castanea, The Journal of the Southern Appalachian Botanical Society publishes refereed papers relating to the botany of the Eastern United States. In addition, as the official publication of the Society, news and information of interest to the membership is also contained within the pages of this quarterly publication. First started in 1936, the journal is now in volume 74 (2009).

Beginning in 2003, SABS started a new series entitled: *Castanea: Occasional Papers in Eastern Botany*. This new publication, as a supplement to *Castanea*, will allow for publication of long manuscripts not appropriate for a regular issue of *Castanea*, collections of shorter manuscripts that treat topics not usually published in *Castanea*, and proceedings arising from symposia and conferences. Publication will be irregular.

About the Southern Appalachian Botanical Society

In 1935 *The Southern Appalachian Botanical Club* was formed at West Virginia University for "all persons interested in the botany of the Southern Appalachian Mountains." Today, the name and purpose has changed slightly to the *Southern Appalachian Botanical Society* (SABS) with its focus on the botany of the eastern states. The membership includes professional and amateur botanists from across the country who are interested in eastern botany, in the journal, and in the activities of the society.

The purpose of this Society shall be to promote botanical interest and to disseminate information concerning the flora and ecology of the southern Appalachian region and the eastern United States. To this end, there is authorized the publication of a scientific periodical to be known as *Castanea, The Journal of the Southern Appalachian Botanical Society*.
